## Technicolour Fleece

With its sparks of colour sprinkled seemingly at random across the thick, natural-coloured wool background, *Fleece* immediately calls to mind a herd of grazing sheep with their bright spray-painted markings. Inspired by what he describes as 'rural graffiti', designer Peter Saville has created a hand-knotted rug with a beautifully irregular surface, soft and bouncy to the touch, like its namesake.

*Fleece's* innovative surface has been achieved by leaving out the shearing process and opening the pile with a double-wash finishing process. Invitingly tactile, the design is available in three different base colours, each a natural, undyed New Zealand yarn and including a wool white, an ash grey and a warm grey.
